

Project: Indica Ethicos

System Specification: Kañjāpaṭṭam (v2.3)

Line Spacing: 1.15

I. Architectural Overview

The **Kañjāpaṭṭam** (कञ्जापट्टम्) is the primary input interface within the *Indica Ethicos* ecosystem. It replaces legacy Western "key/lock" metaphors with the **Kañj** root (to activate/input). The system follows the **-ikā/-ā Protocol**: formal tools are named with the *-ikā* suffix, while physical key labels (stabs) use the long-vowel *-ā* for minimalist scannability.

II. Core Input Blocks (अङ्गकानि - Aṅgakāni)

- Akṣarāni** (अक्षरानि): The Imperishables (Letter Keys).
- Gaṇāṅkāni** (गणाङ्गकानि): The Calculation-Marks (Number Keys).
- Mūlāṅkāni** (मुलाङ्कानि): The Base-Marks (Symbols/Special Characters).

III. Modifier & Navigation Titans

Key	Formal Tool (-ikā)	UI Stab (-ā)	Logic
Control	Yamikā (यमिका)	Yamā	The Restrainer/Twin.
Alternate	Anyikā (अन्यिका)	Anyā	The Alternate Mode.
